Forecast for Monday 06 Mar 2023

Weather: A mix of scattered showers and clear then bright spells to start the week with snow level initially 500m descending to valley level from late afternoon.

Chance of cloud-free hill tops above 600m: 70-80% for any one time but extended clear periods are unlikely given the showery nature of the flow

Low Cloud and visibility: Good or very good, becoming moderate or poor in rain showers, very poor in snow showers and within cloud with bases occasionally lowering to 500m, chiefly as showers cross.
